

Project Management Professional (PMP) Training

Overview

"Let our advance worrying become advance thinking and planning." ~ Winston Churchill

Project management has perhaps been around for a long time and construction of pyramids, temples and cities in ancient times stand as its witnesses.

In modern times, project management has once again emerged as a core competency for the businesses because projects are the ultimate stepping stone to realise strategic goals.

The **Project Management Professional (PMP) Prep** course is intended to help the learners to understand and practice project management. The course is aligned with PMI's "Project Management Body of Knowledge Fifth Edition" Upon successful completion this course, participant would be able to attempt the PMP® certification exam conducted by Project Management Institute, PA, USA.

The Training is designed to cover all 3 critical aspects of PMI Talent triangle and involves plenty of practical case-studies and hands-on sessions.

Course Objective

- Understand the broader context of the project and its strategic importance for Organizational goals
- Develop a broad and adaptable toolkit of techniques to effectively handle the complex projects.
- In-depth understanding of all the 47 project management processes, and its application for delivering projects in time, in scope and in budget.
- Cultivate the important interpersonal skills required for project management

Earn 35 PDUs required for the PMP certification exam
